

## Chapter 8

### HOUSING QUALITY STANDARDS AND RENT REASONABLENESS DETERMINATIONS

[24 CFR 982 Subpart I and 24 CFR 982.507]

#### INTRODUCTION

HUD requires that all units occupied by families receiving Housing Choice Voucher (HCV) assistance meet HUD's Housing Quality Standards (HQS) and permits the PHA to establish additional requirements. The use of the term "HQS" in this plan refers to the combination of both HUD and PHA-established requirements. HQS inspections are required before the Housing Assistance Payments (HAP) Contract is signed and at least annually during the term of the contract.

HUD also requires PHAs to determine that units rented by families assisted under the HCV program have rents that are reasonable when compared to comparable unassisted units in the market area.

This chapter explains HUD and PHA requirements related to housing quality and rent reasonableness as follows:

Part I. Physical Standards. This part discusses the physical standards required of units occupied by HCV-assisted families and identifies decisions about the acceptability of the unit that may be made by the family based upon the family's preference. It also identifies life-threatening conditions that must be addressed on an expedited basis.

Part II. The Inspection Process. This part describes the types of inspections the PHA will make and the steps that will be taken when units do not meet HQS.

Part III. Rent Reasonableness Determinations. This part discusses the policies the PHA will use to make rent reasonableness determinations.

Special HQS requirements for homeownership, manufactured homes, and other special housing types are discussed in Chapter 15 to the extent that they apply in this jurisdiction.

## **PART I: PHYSICAL STANDARDS**

### **8.I.A. GENERAL HUD REQUIREMENTS**

#### **HUD Performance and Acceptability Standards**

HUD's performance and acceptability standards for HCV-assisted housing are provided in 24 CFR 982.401. These standards cover the following areas:

- Sanitary facilities
- Food preparation and refuse disposal
- Space and Security
- Thermal Environment
- Illumination and electricity
- Structure and materials
- Interior Air Quality
- Water Supply
- Lead-based paint
- Access
- Site and neighborhood
- Sanitary condition
- Smoke Detectors

A summary of HUD performance criteria is provided in Attachment 8-1. Additional guidance on these requirements is found in the following HUD resources:

- Housing Choice Voucher Guidebook, Chapter 10.
- HUD Housing Inspection Manual for Section 8 Housing
- HUD Inspection Form, form HUD-52580 (3/01) and Inspection Checklist, form HUD-52580-A (9/00)
- HUD Notice 2003-31, Accessibility Notice: Section 504 of the Rehabilitation Act of 1973; the Americans with Disabilities Act of 1990; the Architectural Barriers Act of 1968 and the Fair Housing Act of 1988.

#### **Tenant Preference Items**

HUD requires the PHA to enforce minimum HQS but also requires that certain judgments about acceptability be left to the family. For example, the PHA must ensure that the unit contains the required sanitary facilities, but the family decides whether the cosmetic condition of the facilities is acceptable. Attachment 8-2 summarizes those items that are considered tenant preferences.

## **Modifications to Provide Accessibility**

Under the Fair Housing Act of 1988 an owner must not refuse the request of a family that contains a person with a disability to make necessary and reasonable modifications to the unit. Such modifications are at the family's expense. The owner may require restoration of the unit to its original condition if the modification would interfere with the owner or next occupant's full enjoyment of the premises. The owner may not increase a customarily required security deposit. However, the landlord may negotiate a restoration agreement that requires the family to restore the unit and, if necessary to ensure the likelihood of restoration, may require the tenant to pay a reasonable amount into an interest bearing escrow account over a reasonable period of time. The interest in any such account accrues to the benefit of the tenant. The owner may also require reasonable assurances that the quality of the work will be acceptable and that any required building permits will be obtained.[24 CFR 100.203; Notice 2003-31].

Modifications to units to provide access for a person with a disability must meet all applicable HQS requirements and conform to the design, construction, or alteration of facilities contained in the UFAS and the ADA Accessibility Guidelines (ADAAG) [28 CFR 35.151(c) and Notice 2003-31] See Chapter 2 of this plan for additional information on reasonable accommodations for persons with disabilities.

### PHA Policy

Any owner that intends to negotiate a restoration agreement or require an escrow account must submit the agreement(s) to the PHA for review.

## **8.I.B. ADDITIONAL LOCAL REQUIREMENTS**

The PHA may impose additional quality standards as long as the additional criteria are not likely to adversely affect the health or safety of participant families or severely restrict housing choice. HUD approval is required if more stringent standards are imposed. HUD approval is not required if the PHA additions are clarifications of HUD's acceptability criteria or performance standards [24 CFR 982.401(a)(4)].

### **Thermal Environment [HCV GB p.10-7]**

The PHA must define a "healthy living environment" for the local climate. This may be done by establishing a temperature that the heating system must be capable of maintaining, that is appropriate for the local climate.

### PHA Policy

The heating system must be capable of maintaining a minimum room temperature of 68 degrees Fahrenheit at a point three (3) feet above the floor and two (2) feet from the exterior wall in all habitable rooms between October 1 and May 1.

### **Space Heater Criteria**

- The PHA grants exemption for units with non-vented space heaters, since there is approximately fifty percent (50%) of available housing using this type system for heating.
- Units using gas space heaters for primary heat source must provide a minimum of 35,000 BTU's per every 800 square feet of units.

- Units with more than two (2) space heaters will be calculated with oxygen consumption using volume of unit divided by the BTU output of heaters to ensure adequate oxygen present in each unit. Any unit calculated over thirty (30) BTU/hr/cubic foot will fail and must have the heating system reduced within acceptable limits.
- All space heaters must have an approved gas stop; approved flexible gas connector (stainless steel or epoxy-coated brass) and all heaters must have been tested by the American Gas Association with permanent plate attached.
- No electric space heaters are allowed for permanent heating of unit.

## Clarifications of HUD Requirements

### PHA Policy

As permitted by HUD, the PHA has adopted the following specific requirements that elaborate on HUD standards.

#### ***Walls***

In areas where plaster or drywall is sagging, severely cracked, or otherwise damaged, it must be repaired or replaced.

#### ***Windows***

Window sashes must be in good condition, solid and intact, and properly fitted to the window frame. Damaged or deteriorated sashes must be replaced.

Windows must be weather-stripped as needed to ensure a weather-tight seal.

Window screens must be in good condition (applies only if screens are present).

At least one screen is required per room in cases where the unit does not have a mechanical cooling system/unit. In these cases, a fan is not considered to be a mechanical cooling system.

Any exterior window unit must be a glass enclosed unit to qualify as the lockable window (i.e., solid storm windows and not lockable screen windows).

#### ***Doors***

All exterior doors must be weather-tight to avoid any air or water infiltration, be lockable, have no holes, have all trim intact, and have a threshold.

All exterior door units will be required to be solid-core wood or steel door units finding major repairs needed to units (i.e. split stiles, holed veneers, dilapidated veneers, etc.). ***Only PHA recognized exclusion: Mobile Homes.***

All interior doors must have no holes, have all trim intact, and be open able without the use of a key.

All bedroom must have an entry door and closet to be considered a bedroom with a minimum of a 7' x 7' x 7' living area along with all other existing requirements for bedroom qualification.

### ***Floors***

All wood floors must be sanded to a smooth surface and sealed. Any loose or warped boards must be resecured and made level. If they cannot be leveled, they must be replaced.

All floors must be in a finished state. Raw wood or unsealed concrete is not permitted.

All floors should have some type of baseshoe, trim, or sealing for a "finished look." Vinyl baseshoe is permitted.

### ***Sinks***

All sinks and commode water lines must have shut off valves, unless faucets are wall mounted.

All worn or cracked toilet seats and tank lids must be replaced and toilet tank lid must fit properly.

All sinks must have functioning stoppers.

### ***Basements***

Any unit with a basement must have a working smoke alarm.

### ***Security***

If window security bars or security screens are present on emergency exit windows, they must be equipped with a quick release system. The owner is responsible for ensuring that the family is instructed on the use of the quick release system.

## **8.I.C. LIFE THREATENING CONDITIONS [24 CFR 982.404(a)]**

HUD requires the PHA to define life-threatening conditions and to notify the owner or the family (whichever is responsible) of the corrections required. The responsible party must correct life threatening conditions within 24 hours of PHA notification.

### **PHA Policy**

The following are considered life-threatening conditions:

Any condition that jeopardizes the security of the unit

Major plumbing leaks or flooding, waterlogged ceiling or floor in imminent danger of falling

Natural or LP gas or fuel oil leaks

Any electrical problem or condition that could result in shock or fire

Absence of a working heating system when outside temperature is below 60 degrees Fahrenheit.

Utilities not in service, including no running hot water

Conditions (including conditions outside of the premise) that present the imminent possibility of injury

Obstacles that prevent safe entrance or exit from the unit

Absence of a functioning toilet in the unit

Inoperable smoke detectors

If an owner fails to correct life-threatening conditions as required by the PHA, the housing assistance payment will be abated and the HAP contract will be terminated. See 8-II-G.

If a family fails to correct a family caused life-threatening condition as required by the PHA, the PHA may terminate the family's assistance. See 8-II.H.

The owner will be required to repair an inoperable smoke detector unless the PHA determines that the family has intentionally disconnected it (by removing batteries or other means). In this case, the family will be required to repair the smoke detector within 24 hours.

### **8-I.D. OWNER AND FAMILY RESPONSIBILITIES [24 CFR 982.404]**

#### **Family Responsibilities**

The family is responsible for correcting the following HQS deficiencies:

- Tenant-paid utilities not in service
- Failure to provide or maintain family-supplied appliances
- Damage to the unit or premises caused by a household member or guest beyond normal wear and tear. "Normal wear and tear" is defined as items which could not be charged against the tenant's security deposit under state law or court practice.

#### **Owner Responsibilities**

The owner is responsible for all HQS violations not listed as a family responsibility above, even if the violation is caused by the family's living habits (e.g., vermin infestation). However, if the family's actions constitute a serious or repeated lease violation the owner may take legal action to evict the family.

#### PHA Policy

While the PHA will review and evaluate HQS violations, in the event that there is a dispute between the Family and Owner as to who is responsible for the violation, the PHA does not have the responsibility to determine who is ultimately responsible for the HQS violation(s). Rather, this responsibility lies with the Owner and Family.

Notwithstanding the foregoing, the PHA reserves the rights to make a decision as to whether the family will receive continued assistance under the HCV program and/or whether the HAP contract will be terminated with the Owner as a result of such HQS violations.

### **8-I-E. SPECIAL REQUIREMENTS FOR CHILDREN WITH ENVIRONMENTAL INTERVENTION BLOOD LEAD LEVEL [24 CFR 35.1225]**

If a PHA is notified by a public health department or other medical health care provider, or verifies information from a source other than a public health department or medical health care provider, that a child of less than 6 years of age, living in an HCV-assisted unit has been

identified as having an environmental intervention blood lead level, the PHA must complete a risk assessment of the dwelling unit. The risk assessment must be completed in accordance with program requirements, and the result of the risk assessment must be immediately provided to the owner of the dwelling unit. In cases where the public health department has already completed an evaluation of the unit, this information must be provided to the owner.

Within 30 days after receiving the risk assessment report from the PHA, or the evaluation from the public health department, the owner is required to complete the reduction of identified lead-based paint hazards in accordance with the lead-based paint regulations [24 CFR 35.1325 and 35.1330]. If the owner does not complete the “hazard reduction” as required, the dwelling unit is in violation of HQS and the PHA will take action in accordance with Section 8-II.G.

PHA reporting requirements, and data collection and record keeping responsibilities related to children with an environmental intervention blood lead level are discussed in Chapter 16.

#### **8-I-F. VIOLATION OF HQS SPACE STANDARDS [24 CFR 982.403]**

If the PHA determines that a unit does not meet the HQS space standards because of an increase in family size or a change in family composition, the PHA must issue the family a new voucher, and the family and PHA must try to find an acceptable unit as soon as possible. If an acceptable unit is available for rental by the family, the PHA must terminate the HAP contract in accordance with its terms.

## PART II: THE INSPECTION PROCESS

### 8-II.A. OVERVIEW [24 CFR 982.405]

#### Types of Inspections

The PHA conducts the following types of inspections as needed. Each type of inspection is discussed in the paragraphs that follow.

- *Initial Inspections.* The PHA conducts initial inspections in response to a request from the family to approve a unit for participation in the HCV program. The unit must pass the HQS inspection before the effective date of the HAP Contract.
- *Annual Inspections.* HUD requires the PHA to inspect each unit under lease at least annually to confirm that the unit still meets HQS. The inspection may be conducted in conjunction with the family's annual reexamination but also may be conducted separately.
- *Special Inspections.* A special inspection may be requested by the owner, the family, or a third party as a result of problems identified with a unit between annual inspections.
- *Quality Control Inspections.* HUD requires that a sample of units be reinspected by a supervisor or other qualified individual to ensure that HQS are being enforced correctly and uniformly by all inspectors.

The PHA does not conduct damage claim inspections or an inspection without a Request for Lease Approval.

#### Inspection of PHA-owned Units [24 CFR 982.352(b)]

The PHA must obtain the services of an independent entity to perform all HQS inspections in cases where an HCV family is receiving assistance in a PHA-owned unit. A PHA-owned unit is defined as a unit that is owned by the PHA that administers the assistance under the consolidated ACC (including a unit owned by an entity substantially controlled by the PHA). The independent agency must communicate the results of each inspection to the family and the PHA. The independent agency must be approved by HUD, and may be the unit of general local government for the PHA jurisdiction (unless the PHA is itself the unit of general local government or an agency of such government).

#### Inspection Costs

The PHA may not charge the family or owner for unit inspections [24 CFR 982.405(e)]. In the case of inspections of PHA-owned units, the PHA may compensate the independent agency from ongoing administrative fee for inspections performed. The PHA and the independent agency may not charge the family any fee or charge for the inspection [24 CFR.982.352(b)].

#### Notice and Scheduling

The family must allow the PHA to inspect the unit at reasonable times with reasonable notice [24 CFR 982.551(d)].

##### PHA Policy

Both the family and the owner will be given reasonable notice of all inspections. Except in the case of a life-threatening emergency, reasonable notice is considered to be not less

than 24 hours. Inspections may be scheduled between 8:00 a.m. and 5:00 p.m. Generally inspections will be conducted on business days only. In the case of a life threatening emergency, the PHA will give as much notice as possible, given the nature of the emergency.

### **Owner and Family Inspection Attendance.**

HUD permits the PHA to set policy regarding family and owner presence at the time of inspection [HCV GB p. 10-27].

#### PHA Policy

When a family occupies the unit at the time of inspection, the presence of the owner or owner's representative and/or an adult family member of the household must be present for the inspection.

At initial inspection of a vacant unit, the PHA will inspect the unit in the presence of the owner or owner's representative. The presence of a family representative is permitted, but is not required.

At all other inspections of a unit, the PHA requires the presence of the owner or the owner's representative and/or a family representative.

## **8-II.B. INITIAL HQS INSPECTION [24 CFR 982.401(a)]**

### **Timing of Initial Inspections**

HUD requires the unit to pass HQS before the effective date of the lease and HAP Contract. HUD requires PHAs with fewer than 1,250 budgeted units to complete the initial inspection, determine whether the unit satisfies HQS, and notify the owner and the family of the determination within 15 days of submission of the Request for Tenancy Approval (RTA). For PHAs with 1,250 or more budgeted units, to the extent practicable such inspection and determination must be completed within 15 days. The 15-day period is suspended for any period during which the unit is not available for inspection [982.305(b)(2)].

#### PHA Policy

The PHA will complete the initial inspection, determine whether the unit satisfies HQS, and notify the owner and the family of the determination within 15 days of submission of the Request for Tenancy Approval (RTA).

### **Inspection Results and Reinspections**

#### PHA Policy

If any HQS violations are identified, the owner will be notified of the deficiencies and be given a time frame to correct them. If requested by the owner, the time frame for correcting the deficiencies may be extended by the PHA for good cause. The PHA will reinspect the unit within 5 business days of the date the owner notifies the PHA in writing that the required corrections have been made.

Repair Time Extension Criteria: Maximum extension that can be granted is 10 days in compliance with criteria below and no extensions granted for any other reason:

1. Weather conditions for exterior repairs must be unfavorable a minimum of twenty (20) days of the thirty-day repair time frame allotted for unit for type of repair. Peeling painted surface conditions must be abated from unit/premises prior to the scheduled re-inspection date/time until weather permits application of new paint coating.

If the time period for correcting the deficiencies (or any PHA-approved extension) has elapsed, or the unit fails HQS at the time of the reinspection, the PHA will notify the owner and the family that the unit has been rejected and that the family must search for another unit. The PHA may agree to conduct a second reinspection, for good cause, at the request of the family and owner.

Following a failed reinspection, the family may submit a new Request for Tenancy Approval for the unit if the family has not found another unit by the time the owner completes all repairs and the family continues to wish to live in the unit.

### **Utilities**

Generally, at initial lease-up the owner is responsible for demonstrating that all utilities are in working order including those utilities that the family will be responsible for paying.

#### PHA Policy

At the time of the initial inspection, the PHA will confirm that utilities are operational before the HAP contract is executed by the PHA.

### **Appliances**

#### PHA Policy

The appliances required to be supplied, if any, by the family must be in place before the HAP contract is executed by the PHA. The PHA will execute the HAP contract based the PHA's confirmation that the appliances have been installed and are working. A microwave and/or stove must be operation and located in the unit in order for a unit to meet the PHA's minimal HQS standards.

## **8.II.C. ANNUAL HQS INSPECTIONS [24 CFR 982.405(a)]**

### **Scheduling the Inspection**

Each unit under HAP contract must have an annual inspection no more than 12 months after the most recent inspection.

#### PHA Policy

If an adult family member cannot be present on the scheduled date, the family should request that the PHA reschedule the inspection. The PHA and family will agree on a new inspection date that generally should take place within 5 business days of the originally scheduled date. The PHA may schedule an inspection more than 5 business days after the original date for good cause.

If the family misses the first scheduled appointment without requesting a new inspection date, the PHA will automatically schedule a second inspection. If the family misses two scheduled inspections without PHA approval, the PHA will consider the family to have

violated its obligation to make the unit available for inspection. This may result in termination of the family's assistance in accordance with Chapter 12.

#### **8-II.D. SPECIAL INSPECTIONS [HCV GB p. 10-30]**

The PHA will conduct a special inspection if the owner, family, or another source reports HQS violations in the unit.

##### PHA Policy

The PHA will conduct a special inspection of the unit if a report of HQS violations in the unit is made in writing.

During a special inspection, the PHA generally will inspect only those deficiencies that were reported. However, the inspector will record any additional HQS deficiencies that are observed and will require the responsible party to make the necessary repairs.

If the annual inspection has been scheduled or is due within 90 days of the date the special inspection is scheduled the PHA may elect to conduct a full annual inspection.

#### **8-II.E. QUALITY CONTROL INSPECTIONS [24 CFR 982.405(b), HCV GB p. 10-32]**

HUD requires a PHA supervisor or other qualified person to conduct quality control inspections of a sample of units to ensure that each inspector is conducting accurate and complete inspections and that there is consistency in the application of the HQS.

The unit sample must include only units that have been inspected within the preceding 3 months. The selected sample will include (1) each type of inspection (initial, annual, and special), (2) inspections completed by each inspector, and (3) units from a cross-section of neighborhoods.

#### **8.II.F. INSPECTION RESULTS AND REINSPECTIONS FOR UNITS UNDER HAP CONTRACT**

##### **Notification of Corrective Actions**

The owner and the family will be notified in writing of the results of all inspections. When an inspection identifies HQS failures, the PHA will determine (1) whether or not the failure is a life threatening condition and (2) whether the family or owner is responsible.

##### PHA Policy

When life threatening conditions are identified, the PHA will immediately notify both parties by telephone, facsimile, or email. The notice will specify who is responsible for correcting the violation. The corrective actions must be taken within 24 hours of the PHA's notice.

When failures that are not life threatening are identified, the PHA will send the owner and the family a written notification of the inspection results within 5 business days of the inspection. The written notice will specify who is responsible for correcting the violation, and the time frame within which the failure must be corrected. Generally not more than 30 days will be allowed for the correction.

The notice of inspection results will inform the owner that if life threatening conditions are not corrected within 24 hours, and non-life threatening conditions are not corrected

within the specified time frame (or any PHA-approved extension), the owner's HAP will be abated in accordance with PHA policy (see 8-II.G.). Likewise, in the case of family caused deficiencies, the notice will inform the family that if corrections are not made within the specified time frame (or any PHA-approved extension, if applicable) the family's assistance will be terminated in accordance with PHA policy (see Chapter 12).

### **Extensions**

For conditions that are life-threatening, the PHA cannot grant an extension to the 24 hour corrective action period. For conditions that are not life-threatening, the PHA may grant an exception to the required time frames for correcting the violation, if the PHA determines that an extension is appropriate [24 CFR 982.404].

#### PHA Policy

Extensions will be granted in cases where the PHA has determined that the owner has made a good faith effort to correct the deficiencies and is unable to for reasons beyond the owner's control. Reasons may include, but are not limited to:

- A repair cannot be completed because required parts or services are not available.
- A repair cannot be completed because of weather conditions.
- A reasonable accommodation is needed because the family includes a person with disabilities.

The length of the extension will be determined on a case by case basis, but will not exceed 60 days, except in the case of delays caused by weather conditions. In the case of weather conditions, extensions may be continued until the weather has improved sufficiently to make repairs possible. The necessary repairs must be made within 15 calendar days, once the weather conditions have subsided.

### **Reinspections**

#### PHA Policy

The PHA will conduct a reinspection immediately following the end of the corrective period, or any PHA approved extension.

The family and owner will be given reasonable notice of the reinspection appointment. If the deficiencies have not been corrected by the time of the reinspection, the PHA will send a notice of abatement to the owner, or in the case of family caused violations, a notice of termination to the family, in accordance with PHA policies. If the PHA and owner are unable to gain entry to the unit in order to conduct the scheduled reinspection, the PHA will consider the family to have violated its obligation to make the unit available for inspection. This may result in termination of the family's assistance in accordance with Chapter 12.

## **8.II.G. ENFORCING OWNER COMPLIANCE**

If the owner fails to maintain the dwelling unit in accordance with HQS, the PHA must take prompt and vigorous action to enforce the owner obligations.

## **HAP Abatement**

If an owner fails to correct HQS deficiencies by the time specified by the PHA, HUD requires the PHA to abate housing assistance payments no later than the first of the month following the specified correction period (including any approved extension) [24 CFR 985.3(f)]. No retroactive payments will be made to the owner for the period of time the rent was abated. Owner rents are not abated as a result of HQS failures that are the family's responsibility.

### PHA Policy

The PHA will make all HAP abatements effective as of the last day following the expiration of the PHA specified correction period (including any extension).

The PHA will inspect abated units within 5 business days of the owner's notification that the work has been completed. Payment will resume effective on the day the unit passes inspection.

During any abatement period the family continues to be responsible for its share of the rent. The owner must not seek payment from the family for abated amounts and may not use the abatement as cause for eviction.

## **HAP Contract Termination**

The PHA must decide how long any abatement period will continue before the HAP contract will be terminated. The PHA should not terminate the contract until the family finds another unit, provided the family does so in a reasonable time [HCV GB p. 10-29] and must give the owner reasonable notice of the termination. The PHA will issue a voucher to permit the family to move to another unit as described in Chapter 10.

### PHA Policy

The maximum length of time that a HAP may be abated is the lesser of 90 days or the number of days until the expiration of the HAP contract. However, if the owner completes corrections and notifies the PHA before the termination date of the HAP contract, the PHA may rescind the termination notice if (1) the family still resides in the unit and wishes to remain in the unit and (2) the unit passes inspection.

Reasonable notice of HAP contract termination by the PHA is 30 days.

## **8.II.H. ENFORCING FAMILY COMPLIANCE WITH HQS [24 CFR 982.404(b)]**

Families are responsible for correcting any HQS violations listed in paragraph 8.I.D. If the family fails to correct a violation within the period allowed by the PHA (and any extensions), the PHA will terminate the family's assistance, according to the policies described in Chapter 12.

If the owner carries out a repair for which the family is responsible under the lease, the owner may bill the family for the cost of the repair.

## **PART III: RENT REASONABLENESS [24 CFR 982.507]...**

### **8-III.A. OVERVIEW**

No HAP contract can be approved until the PHA has determined that the rent for the unit is reasonable. The purpose of the rent reasonableness test is to ensure that a fair rent is paid for each unit rented under the HCV program.

HUD regulations define a reasonable rent as one that does not exceed the rent charged for comparable, unassisted units in the same market area. HUD also requires that owners not charge more for assisted units than for comparable units on the premises. This part explains the method used to determine whether a unit's rent is reasonable.

#### **PHA-owned Units [24 CFR 982.352(b)]**

In cases where an HCV family is receiving assistance in a PHA-owned unit, the PHA must obtain the services of an independent entity to determine rent reasonableness in accordance with program requirements, and to assist the family in negotiating the contract rent when the family requests assistance. A PHA-owned unit is defined as a unit that is owned by the PHA that administers the assistance under the consolidated ACC (including a unit owned by an entity substantially controlled by the PHA). The independent agency must communicate the results of the rent reasonableness determination to the family and the PHA. The independent agency must be approved by HUD, and may be the unit of general local government for the PHA jurisdiction (unless the PHA is itself the unit of general local government or an agency of such government).

### **8-III.B. WHEN RENT REASONABLENESS DETERMINATIONS ARE REQUIRED**

#### **Owner-initiated Rent Determinations**

The PHA must make a rent reasonableness determination at initial occupancy and whenever the owner requests a rent adjustment.

The owner and family first negotiate the rent for a unit. The PHA (or independent agency in the case of PHA-owned units) will assist the family with the negotiations upon request. At initial occupancy the PHA must determine whether the proposed rent is reasonable before a HAP Contract is signed. The owner must not change the rent during the initial lease term. Subsequent requests for rent adjustments must be consistent with the lease between the owner and the family. Rent increases will not be approved unless any failed items identified by the most recent HQS inspection have been corrected.

#### PHA Policy

After the initial occupancy period, the owner may request a rent adjustment no more than one time per year in accordance with the owner's lease. For rent increase requests after initial lease-up, the PHA may request owners to provide information about the rents charged for other units on the premises, if the premises include more than 4 units. In evaluating the proposed rents in comparison to other units on the premises the PHA will consider unit size and length of tenancy in the other units.

The PHA will determine whether the requested increase is reasonable within 10 business days of receiving the request from the owner. The owner will be notified of the determination in writing.

All requests for rent adjustments by the owner must be made at least 60 days prior to the expiration of the HAP contract between the PHA and the owner of the unit. All rents adjustments will be effective on the first day of the new HAP contract between the PHA and the owner not the unit.

### **PHA- and HUD-Initiated Rent Reasonableness Determinations**

HUD requires the PHA to make a determination of rent reasonableness (even if the owner has not requested a change) if there is a 5 percent decrease in the Fair Market Rent that goes into effect at least 60 days before the contract anniversary date. HUD also may direct the PHA to make a determination at any other time. The PHA may decide that a new determination of rent reasonableness is needed at any time.

#### PHA Policy

In addition to the instances described above, the PHA will make a determination of rent reasonableness at any time after the initial occupancy period if: (1) the PHA determines that the initial rent reasonableness determination was in error or (2) the PHA determines that the information provided by the owner about the unit or other units on the same premises was incorrect.

### **8-III.C. HOW COMPARABILITY IS ESTABLISHED**

#### **Factors to Consider**

HUD requires PHAs to take into consideration the factors listed below when determining rent comparability. The PHA may use these factors to make upward or downward adjustments to the rents of comparison units when the units are not identical to the HCV-assisted unit.

- Location and age
- Unit size including the number of rooms and square footage of rooms
- The type of unit including construction type (e.g., single family, duplex, garden, low-rise, high-rise)
- The quality of the units including the quality of the original construction, maintenance and improvements made.
- Amenities, services, and utilities included in the rent

#### **Units that Must Not be Used as Comparables**

Comparable units must represent unrestricted market rents. Therefore, units that receive some form of federal, state, or local assistance that imposes rent restrictions cannot be considered comparable units. These include units assisted by HUD through any of the following programs: Section 8 project-based assistance, Section 236 and Section 221(d)(3) Below Market Interest Rate (BMIR) projects, HOME or Community Development Block Grant (CDBG) program-assisted units in which the rents are subsidized; units subsidized through federal, state, or local tax credits; units subsidized by the Department of Agriculture rural housing programs, and units that are rent-controlled by local ordinance.

## **Rents Charged for Other Units on the Premises**

The Request for Tenancy Approval (HUD-52517) requires owners to provide information, on the form itself, about the rent charged for other unassisted comparable units on the premises if the premises include more than 4 units.

By accepting the PHA payment each month the owner certifies that the rent is not more than the rent charged for comparable unassisted units on the premises. If asked to do so, the owner must give the PHA information regarding rents charged for other units on the premises.

## **8-III.D. PHA RENT REASONABLENESS METHODOLOGY**

### **How Market Data is Collected**

#### PHA Policy

The PHA will collect and maintain data on market rents in the PHA's jurisdiction. Information sources include newspapers, realtors, market surveys, inquiries of owners and other available sources. The data will be maintained by bedroom size and market areas. Market areas may be defined by zip codes, census tract, neighborhood, and identifiable natural or man-made boundaries. The data will be updated on an ongoing basis and rent information that is more than 12 months old will be eliminated from the database.

### **How Rents are Determined**

#### PHA Policy

The PHA is responsible to ensure that the rents charged by owners are reasonable based upon objective comparables in the rental market. When the PHA has determined the unit meets the minimum Housing Quality Standards (HQS), the lease is approvable, and the rent is reasonable, it will make timely payments to the owner and notify the owner of the procedures for rent adjustments in the certificate and voucher programs. This section explains PHA procedures for determination of rent-reasonableness, payments to owners, adjustments to payment standards, and rent adjustments.

#### **A. OWNER PAYMENT IN THE CERTIFICATE PROGRAM**

The payment to the landlord, called the Housing Assistance Payment (HAP), is the Contract Rent approved by the PHA less the Tenant Rent determined by the PHA.

#### **B. OWNER PAYMENT IN THE VOUCHER PROGRAM**

The maximum subsidy for each family is determined by the payment standard for the voucher size issued to the family, less thirty (30) percent of the family's Monthly Adjusted Income. The actual subsidy level could be less if the family is required to pay the Minimum Total Tenant Payment (ten (10) percent of the family's Monthly Income).

The voucher size issued to the family is based on PHA Subsidy Standards. The payment standard for the family is based on the lesser of the Payment Standard for the voucher size issued and the Payment Standard for the unit selected.

The Housing Assistance Payment to the owner is the lesser of the subsidy described above or the rent charged by the owner.

**C. MAKING PAYMENTS TO OWNERS**

Once the HAP Contract is executed, the PHA begins processing payments to the landlord. The effective date and the amount of the PHA payment is communicated by mailing a copy of the paperwork to the owner. A HAP Register will be used as a basis for monitoring the accuracy and timeliness of payments. Changes are made automatically to the HAP Register for the following month. Checks are disbursed by the PHA Accountant to the owner each month.

Checks may not be picked up by owner at the PHA unless a manual warrant is generated.

Checks will be disbursed by the fifth working day of the month. Exceptions may be made with the approval of the Housing Administrator for the PHA processing errors.

Checks that are not received will not be replaced until a written request has been received from the payee and a stop payment has been put on the check.

**D. RENT REASONABLENESS DETERMINATIONS**

Rent reasonableness determinations are made when units are placed under HAP Contract for the first time, and when an owner requests a rent increase in the Voucher Program.

For the voucher program, the PHA will determine and document on a case-by-case basis that the approved rent:

Does not exceed rents currently charged by the same owner for an equivalent assisted or unassisted unit in the same building or complex; and,

Is reasonable in relation to rents currently charged by other owners for comparable units in the unassisted market.

At least three (3) comparable units will be used for each rent determination, two (2) of which must be from the second category. All comparables must be based on the rent that the unit would command if leased in the current market. Leased in the current market means that the unit has been leased within the last sixty (60) days.

The data for other unassisted units will be gathered from newspapers, realtors, professional associations, inquiries of owners, market surveys, and other available sources.

The market areas for rent reasonableness are census tracts within the PHA's jurisdiction. If three (3) comparables in the same census tract cannot be found, other like comparables will be obtained from adjacent census tracts until three (3) units are obtained for the rent test. (Subject units within a defined housing market area will be compared to similar units within the same census tract.)

The following items will be used for rent reasonableness documentation:

Square Footage;

Number of Bedrooms;

Facilities;

Location;

Number of Bathrooms;

Quality;

Date Built;

Unit Type; and,

Management and Maintenance Services.

The PHA maintains a notebook(s) which includes data on unassisted units for use by staff in making rent reasonableness determinations. The data is updated on an on-going basis and purged when it is more than twelve (12) months old.

#### **E. PAYMENT STANDARDS FOR THE VOUCHER PROGRAM**

The Payment Standard is initially set by the PHA at the Fair Market Rent (FMR) in effect at the time the Annual Contributions Contract for the first increment of Voucher funding is approved by HUD. The Payment Standard is used to determine the maximum subsidy which can be paid by the PHA on behalf of the family.

#### **F. ADJUSTMENTS TO PAYMENT STANDARDS**

Payment Standards may be adjusted to increase Housing Assistance Payments in order to keep rents affordable. The PHA will not raise the Payment Standards so high the number of families that can be assisted under available funding is substantially reduced. Nor will the PHA raise Standards if the need is solely to make "high end" units available to voucher holders.

The PHA will review the Payment Standard annually to determine whether an adjustment should be made for some or all unit sizes. The Payment Standard will be reviewed according to HUD's requirements and this policy and if an increase is warranted, the payment standard will be adjusted within eighty percent of the current Fair Market Rent.

The PHA may use some or all of the measures below in making its determination whether an adjustment should be made to the Payment Standards.

##### **Quality of Units Selected**

The PHA will review the quality of units selected by participant families before determining any change to the Payment Standard to ensure that Payment Standard increases are only made when needed to reach the mid-range of the market.

### **PHA Decision Point**

The PHA will review the quality and size of units where the Rents to Owner are above the Payment Standard by more than twenty-five percent. If more than fifty percent of families have selected above-average units or have selected larger units than the Voucher size, the PHA may elect not to increase the Payment Standard or continue the analysis.

If the analysis continues, the PHA will divide those rents between contracts within the first year and after the first year. If the Rents to Owner are more than twenty-five percent above the average, in any bedroom size, the PHA will continue the analysis. If not, the PHA may elect not to increase the Payment Standard for certain bedroom sizes.

### **Rent to Owner Increases**

The PHA may review a sample of the units to determine how often owners are increasing rents after the first year of the lease and the average percent of increase by bedroom size. The sample will be divided into units with and without the highest cost utility included.

### **Rent Reasonableness Data Base/Average Contract Rents**

The PHA will compare the Payment Standards to average rents in its Rent Reasonableness Data Base and to the average Contract Rents by unit size. The Payment Standards should not exceed by more than ten (10) percent of these amounts.

### **Lowering of the Payment Standard**

Statistical analysis may reveal the Payment Standard should be lowered, in which case, the Payment Standard should not be less than eighty percent of the current FMR. If the FMR is lowered, the Payment Standard may not exceed the FMR except in those cases where families are held harmless until they move to a different dwelling unit or have a change in family composition which would affect their voucher size.

### **Financial Feasibility**

Before increasing the Payment Standard, the PHA may review the budget and the project reserve, to determine the impact projected subsidy increases would have on funding available for the program and number of families served.

For this purpose, the PHA will compare the number of families who could be served under a higher Payment Standard with the number assisted under current Payment Standards.

### **File Documentation**

A file will be retained by the PHA for at least three (3) years to document the analysis and findings to justify whether or not the Payment Standard was changed.

**G. RENT ADJUSTMENTS**

**Voucher Program**

Owners may not request rent adjustments in the Voucher Program to be effective prior to the expiration of the first year of the lease. Rent adjustments are effective:

With a sixty (60) day written notice to the family and a copy to the PHA. The PHA will advise the family as to whether the rent is reasonable and shall approve or disapprove the rent increase.

## **EXHIBIT 8-1: OVERVIEW OF HUD HOUSING QUALITY STANDARDS**

Note: This document provides an overview of HQS. For more detailed information see the following documents:

- 24 CFR 982.401, Housing Quality Standards (HQS)
- Housing Choice Voucher Guidebook, Chapter 10.
- HUD Housing Inspection Manual for Section 8 Housing
- HUD Inspection Form, form HUD-52580 (3/01) and Inspection Checklist, form HUD-52580-A (9/00)

### **Sanitary Facilities**

The dwelling unit must include sanitary facilities within the unit. The sanitary facilities must be usable in privacy and must be in proper operating condition and adequate for personal cleanliness and disposal of human waste.

### **Food Preparation and Refuse Disposal**

The dwelling unit must have space and equipment suitable for the family to store, prepare, and serve food in a sanitary manner.

### **Space and Security**

The dwelling unit must provide adequate space and security for the family. This includes having at least one bedroom or living/sleeping room for each two persons.

### **Thermal Environment**

The unit must have a safe system for heating the dwelling unit. Air conditioning is not required but if provided must be in proper operating condition. The dwelling unit must not contain unvented room heaters that burn gas, oil, or kerosene. Portable electric room heaters or kitchen stoves with built-in heating units are not acceptable as a primary source of heat for units located in climatic areas where permanent heat systems are required.

### **Illumination and Electricity**

Each room must have adequate natural or artificial illumination to permit normal indoor activities and to support the health and safety of occupants. The dwelling unit must have sufficient electrical sources so occupants can use essential electrical appliances. Minimum standards are set for different types of rooms. Once the minimum standards are met, the number, type and location of electrical sources are a matter of tenant preference.

### **Structure and Materials**

The dwelling unit must be structurally sound. Handrails are required when four or more steps (risers) are present, and protective railings are required when porches, balconies, and stoops are thirty inches or more off the ground. The elevator servicing the unit must be working [if there is one]. Manufactured homes must have proper tie-down devices capable of surviving wind loads common to the area.

## **Interior Air Quality**

The dwelling unit must be free of air pollutant levels that threaten the occupants' health. There must be adequate air circulation in the dwelling unit. Bathroom areas must have one openable window or other adequate ventilation. Any sleeping room must have at least one window. If a window was designed to be opened, it must be in proper working order.

## **Water Supply**

The dwelling unit must be served by an approved public or private water supply that is sanitary and free from contamination. Plumbing fixtures and pipes must be free of leaks and threats to health and safety.

## **Lead-Based Paint**

Lead-based paint requirements apply to dwelling units built prior to 1978 that are occupied or can be occupied by families with children less than seven years of age, excluding zero bedroom dwellings. Owners must:

- Disclose known lead-based paint hazards to prospective tenants before the lease is signed,
- provide all prospective families with "Protect Your Family from Lead in Your Home",
- Stabilize deteriorated painted surfaces and conduct hazard reduction activities when identified by the PHA
- Notify tenants each time such an activity is performed
- Conduct all work in accordance with HUD safe practices. The person conducting the working must provide documentation to the PHA that he or she has completed a training class for safe work practices.
- As part of ongoing maintenance ask each family to report deteriorated paint.

For units occupied by environmental intervention blood lead level (lead poisoned) children under seven years of age, a risk assessment must be conducted (paid for by the PHA). If lead hazards are identified during the risk assessment, the owner must complete hazard reduction activities.

See HCV GB p. 10-15 for a detailed description of these requirements. For additional information on lead-based paint requirements see 24 CFR 35, Subparts A, B, M, and R.

## **Access**

Use and maintenance of the unit must be possible without unauthorized use of other private properties. The building must provide an alternate means of exit in case of fire.

## **Site and Neighborhood**

The site and neighborhood must be reasonably free from disturbing noises and reverberations, excessive trash or vermin, or other dangers to the health, safety, and general welfare of the occupants.

**Sanitary Condition**

The dwelling unit and its equipment must be in sanitary condition and free of vermin and rodent infestation. The unit must have adequate barriers to prevent infestation.

**Smoke Detectors**

Smoke detectors must be installed in accordance with and meet the requirements of the National Fire Protection Association Standard (NFPA) 74 (or its successor standards). If the dwelling unit is occupied by any person with a hearing impairment, smoke detectors must have an appropriate alarm system as specified in NFPA 74 (or successor standards).

**Hazards and Health/Safety**

The unit, interior and exterior common areas accessible to the family, the site, and the surrounding neighborhood must be free of hazards to the family's health and safety.

<p style="text-align: center;"><b>EXHIBIT 8-2: SUMMARY OF TENANT PREFERENCE AREAS RELATED TO HOUSING QUALITY</b></p>
--

Note: This document provides an overview of unit and site characteristics and conditions for which the family determines acceptability. For more detailed information see the following documents:

- Housing Choice Voucher Guidebook, Chapter 10.
- HUD Housing Inspection Manual for Section 8 Housing
- HUD Inspection Form, form HUD-52580 (3/01) and Inspection Checklist, form HUD-52580-A (9/00)

Provided the minimum housing quality standards have been met, HUD permits the family to determine whether the unit is acceptable with regard to the following characteristics.

- *Sanitary Facilities.* The family may determine the adequacy of the cosmetic condition and quality of the sanitary facilities, including the size of the lavatory, tub, or shower; the location of the sanitary facilities within the unit; and the adequacy of the water heater.
  - *Food Preparation and Refuse Disposal.* The family selects size and type of equipment it finds acceptable. When the family is responsible for supplying cooking appliances, the family may choose to use a microwave oven in place of a conventional oven, stove, or range. When the owner is responsible for providing cooking appliances, the owner may offer a microwave oven in place of an oven, stove, or range only if other subsidized and unsubsidized units on the premises are furnished with microwave ovens only. The adequacy of the amount and type of storage space, the cosmetic conditions of all equipment, and the size and location of the kitchen are all determined by the family.
  - *Space and Security.* The family may determine the adequacy of room sizes and room locations. The family is also responsible for deciding the acceptability of the type of door and window locks.
  - *Energy conservation items.* The family may determine whether the amount of insulation, presence of absence of storm doors and windows and other energy conservation items are acceptable.
  - *Illumination and Electricity.* The family may determine whether the location and the number of outlets and fixtures (over and above those required to meet HQS standards) are acceptable or if the amount of electrical service is adequate for the use of appliances, computers, or stereo equipment.
- (6) *Structure and Materials.* Families may determine whether minor defects, such as lack of paint, or worn flooring or carpeting will affect the livability of the unit.
- (7) *Indoor Air.* Families may determine whether window and door screens, filters, fans, or other devices for proper ventilation are adequate to meet the family's needs. However, if screens are present they must be in good condition.
- (8) *Sanitary Conditions.* The family determines whether the sanitary conditions in the unit, including minor infestations, are acceptable.

(9) *Neighborhood conditions.* Families may determine whether neighborhood conditions such as the presence of drug activity, commercial enterprises, and convenience to shopping will affect the livability of the unit.

Families have no discretion with respect to lead-based paint standards and smoke detectors.
